

CosaClean®

Advanced Technology for Indoor Air Quality

BECAUSE CLEAN AIR MATTERS

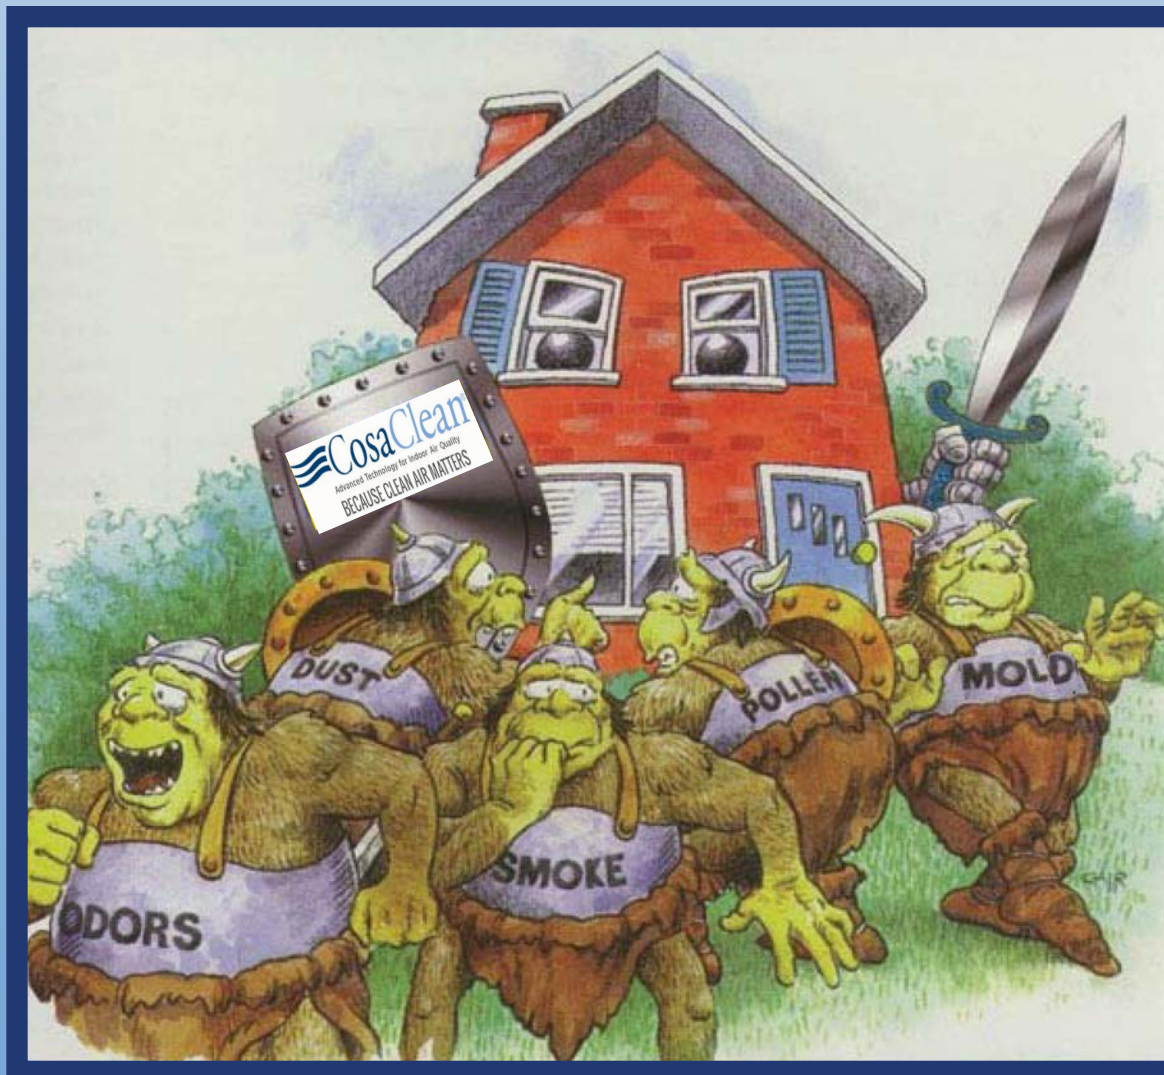

When the **evil forces** of obnoxious air have you surrounded . . .

CosaClean®

Whole Home Air Purification System to the rescue!

-  Reduces allergy suffering.
-  Reduces annoying smoke and odors.
-  Reduces dust.
-  Controls germ-laden dust and other indoor pollutants.

...All with a small, lightweight, low-maintenance unit designed to install conveniently in your household HVAC system.

CosaClean® *to the rescue!*

www.cosaclean.com

Introducing...

Specifically designed for the home, the CosaClean® is a compact, modular version of the CosaTron Contamination Control System – successfully used in commercial applications for over 60 years. The CosaClean® is easily incorporated into standard household air-handling systems. The CosaClean® provides cleaner air and odor control when used in conjunction with effective filtration.

WHAT IS THE COSACLEAN®?

The CosaClean® is not a filter, not an ionizer, and produces no ozone. The CosaClean® is a contamination control system, that provides cleaned recirculated air to the entire house. The CosaClean® greatly increases the collision rate of contaminants, causing them to adhere to each other. The small particles become large enough to be removed by your existing filters – thereby increasing filter efficiency.

CONTAMINANT EXCITATION CONCEPT

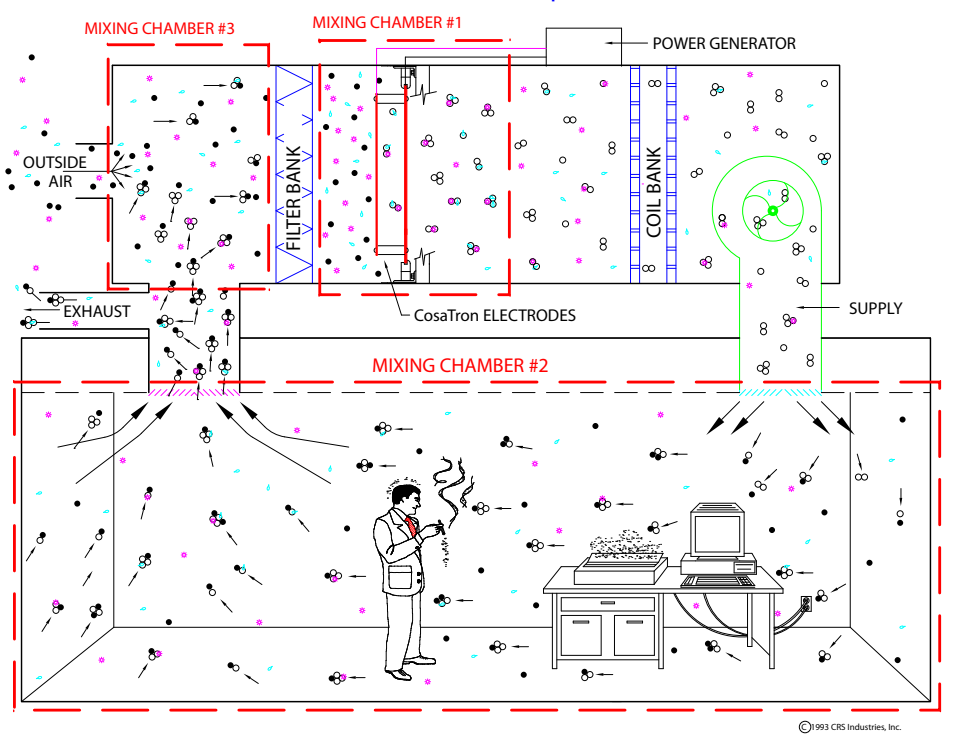

CHAMBER 1

The CosaClean® creates a complex electrical field that influences the behavior of fine particles such as dust, smoke, pollen, and offensive odors – this “excitation” causes the particles to collide and become larger.

CHAMBER 2

In the “Conditioned Space”, the enlarged particles sweep up even more tiny particles and gases, which are then carried to the returns and filter.

Contaminant Excitation Concept

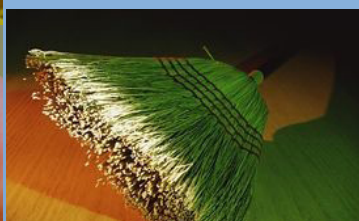

HOW DOES COSACLEAN® SAVE YOU MONEY?

Helps provide relief to allergy sufferers.

Protects your investment in your home. Things stay cleaner and last longer.

Does not require expensive Hepa or Carbon Filters.

Installed in your air-handling system, CosaClean® quietly treats your entire home. Out of sight, out of mind. Maintenance is a breeze.

HOW MANY OF THESE CONTAMINANTS ARE IN YOUR HOME?

LIVING ROOM, FAMILY ROOM & DINING ROOM – Fireplaces, plants, vacuum cleaner dust, pollen, plaster, paint, chemicals from carpeting and particle board, dust pet dander, pesticides, cigarette smoke, household disinfectants, floor wax, furniture polish, cleaning supplies, room air-fresheners.

KITCHEN & LAUNDRY ROOM – Cooking odors, grease, oven cleaner, bleach, ammonia, lint, dirty laundry, cat litter box.

GARAGE - Cleaning supplies, solvents, paints, thinner, varnish, gasoline, swimming pool supplies, motor oil, fertilizer, pesticides, car wax, wood stain, sawdust, metal particles, carbon monoxide exhaust from gas-driven devices – cars, heaters, lawn mowers, etc.

BEDROOMS & KIDS ROOMS – Model airplane glue, hobby materials, family pets, dirty laundry, hair spray, perfume, odors from dry-cleaning.

BATHROOM - Tub and toilet cleaners, shampoo, hair spray, hair coloring and permanent preparations, medical supplies, powders, alcohol, scented products and sprays, bioafluentes.

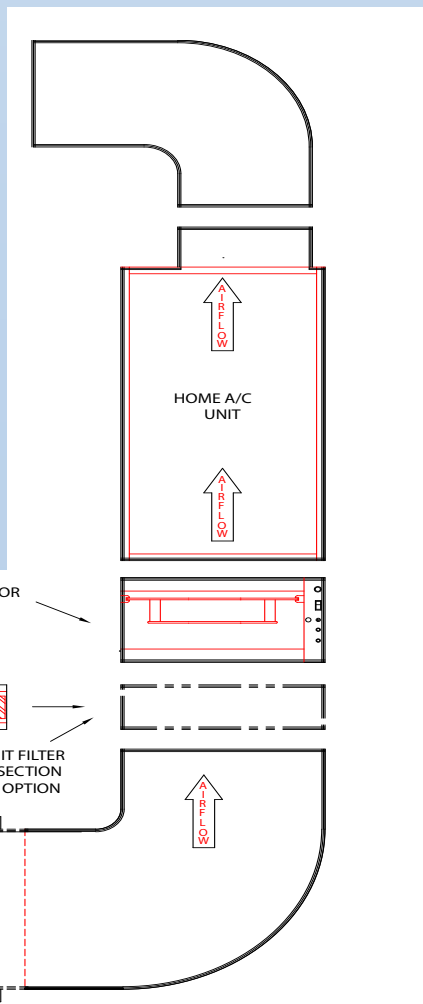

CosaClean® SPECIFICATIONS AND INSTALLATION

The CosaClean® is equipped with a UL-approved solid state Power Generator to provide high-voltage (HV) direct current and high-frequency (HF) alternating current to the electrode assembly.

The generator is factory wired for 110/120 VAC nominal voltage input power, and uses less energy than a 50 watt light bulb.

The CosaClean® is equipped with a generator ON/OFF switch, indicator lamps, and a circuit breaker.

Uses over-the-counter filters that can be purchased in hardware or home-improvement stores.

WHAT HOMEOWNERS ARE SAYING ABOUT THE SYSTEM:

"The CosaClean® system so dramatically reduced allergies in our home that now, everyone gets a good night's sleep."

– Frank W., Sacramento, CA (Engineer)

"I get quite a bit of throat and eye irritation if the unit is not turned on for even a half a day..."

–George A., MD, Tampa, FL (Allergist)

"To those suffering from respiratory problems, the CosaClean® system brings significant relief."

–Helen M., Jeffersonton, VA (Allergy Sufferer)

CosaClean® delivers what it promises – a cleaner environment for me to raise my family in."

–Bill L., New Orleans, LA (HVAC Specialist)

"With the CosaClean® installed... my family has noticed that they have been able to reduce their use of medications, especially their inhalers, and have experienced a lesser degree of problems this spring with allergies. I have also noticed that the house appears cleaner."

–Robert T., St. Louis, MO (HVAC Design Engineer)

Advanced Technology for Indoor Air Quality

Is a pioneer in developing and manufacturing air purification and contamination reduction systems.

For over 60 years, CosaTron® has been installed in arenas, airports, churches, hospitals, casinos, bingo halls, restaurants, clean rooms, educational facilities, industry, office and bank buildings throughout the world. Now, CosaTron® brings this advanced technology for air cleaning to your front door. At CosaTron®, clean air is our only goal.

Over the years those familiar with CosaTron® in the commercial world have requested a product that could be installed in the home. In response, CosaTron® now offers a residential system in a scaled down version manufactured specifically for the home. Introducing CosaClean®. Now, CosaClean® brings industrial-strength air cleaning capability to your home.

At last, really clean air for the most important people in your life.
